

## **Demand PM to rescue the NRI Indians from the Afghanistan**

The people from India are demanding the PM to rescue their family members who are trapped in the earthquake disaster in Afghanistan. The people from India are panicked to know how their family members are in Afghanistan, they are unable to communicate with their family members. There is no proper response from the minister of foreign affairs, so the people from India are very disappointed with the minister, so they decide to directly protest in front of the PM's office. The protest became so severe and it was uncontrollable by the police force, so the pm decided to take this problem to parliament to discuss it. Afghanistan was severely affected by the earthquake. The people from India who work there as NRI got affected by this severely. They are unable to reach out to their family. They have no proper place to relocate, because the native Afghanistan people also have no proper rescue team by their government. So the Indian NRI didn't get any support from the government. The Indian embassy in Afghanistan tries to help and reach out to the Indian NRI and accommodate them at one place and make a communication between them and also to their family. Meanwhile the afghanistan government stops the flight transport between all the countries. This makes Indian NRIs in afghan get disappointed and panicked severely. Our financial minister nirmala sitharaman insist PM to take budget from foreign ministry and arrange separate flight to rescue the indian at afghanistan. The people from india and opposition party wait for the decision of pm. The situation is very heady for people from India and also NRI in Afghanistan.
